

SenseOCEAN will be present at Oceanology International from 15-17th March 2016 at ExCel in London, UK (see [www.oceanologyinternational.com/](http://www.oceanologyinternational.com/) for further details).

Come and see us on the 'Ocean of Tomorrow' stand (A315) where there will be information about SenseOCEAN and other Ocean of Tomorrow projects as well as sensor demonstrations and displays.

There will be two additional events in Room 9:

Tuesday 15th March ,14:00-15:00.

Join us for a poster session

Wednesday 16th March, 13:00-17:00

Join us for flash presentations from the projects, question and answer sessions and a roundtable discussion where you can find out what the 'Ocean of Tomorrow' projects can do for you.

Outline draft agenda (timings may change - see stand on the day for up to date agenda)

13:00 Introduction to Ocean of Tomorrow

13:20 BRAAVOO: Biosensors for realtime monitoring of marine contaminants

13:30 COMMON SENSE: Cost effective sensors interoperable with existing ocean observing systems

13:40 EnviGuard: In-situ measurement of man-made chemicals and biohazards

13:50 MariaBox: Marine environmental in situ assessment and monitoring tool box

14:00 NeXOS: Low-cost, compact and integrated sensors

14:20 SCHeMA: Integrated in-situ chemical mapping probes

14:30 SenseOCEAN: Marine sensors for the 21st Century

14:40 SMS: Sensing toxicants in marine waters using biosensors

14:50 BRIDGES: Development of glider environmental services

15:30 Round Table: What can the Ocean of Tomorrow projects do for you?

To register, please go to <http://conference.noc.ac.uk/oceanology-international-workshops>

SenseOCEAN and the 'Ocean of Tomorrow' projects are funded by the European Union Seventh Framework Program (FP7/2007-2013)
